909.01 DEFINITIONS; MAP OF MAJOR AND MINOR DITCHES.

As used in this chapter, the words “ditches”, “watercourses” and “drainage improvements” mean and include a stream of water flowing in a definite channel, having a bed and sides or banks, and discharging itself into some other stream or body of water, whether a natural formation or manmade, whether or not the stream flows continuously, whether or not it discharges itself into another stream or body of water. The terms “ditches”, “watercourses” and “drainage improvements” include, but are not limited to, any ditch, drain or watercourse which has become the outlet of agricultural drainage, regardless of the time of usage, provided that the conditions contained in this chapter are complied with. Ditches are further classified herein as major and minor ditches, which are identified on a map or maps that may, from time to time, be prepared by or on behalf of the City showing the major and minor ditches in the City. (Ord. 18- 99. Passed 4-27-99.)

909.02 MAINTENANCE; AUTHORITY OF THE SERVICE DIRECTOR.

(a) All ditches, watercourses and drainage improvements of every kind, whether located within public or private property, shall be under the control of the Service Director or his or her designated agent.

(b) In cleaning, repairing and performing other maintenance work on ditches, watercourses and drainage improvements, the Service Director or his designated agent may go upon adjoining or abutting lands within the area necessary for proper operation of the required machinery, tools, motor vehicles, conveyances or other equipment. The area necessary shall be seventy-five feet in the case of a major ditch and fifty feet in the case of a minor ditch, with the centerline thereof being the center of the ditch, watercourse or drainage improvement. If, in the course of the work, it is necessary to damage or temporarily remove fences, poles or wire lines, then the cost of repairing or replacing the fences, poles and wire lines shall be the responsibility of the City. (Ord. 18-99. Passed 4-27-99.)

909.03 AUTHORITY OF CITY GENERALLY.

The City shall have the authority to maintain, keep and repair ditches, watercourses and drainage improvements, together with facilities and appurtenances necessary and proper therefor. (Ord. 18-99. Passed 4-27-99.)

909.04 AUTHORITY OF CITY TO DRAIN OR FILL LOTS AND LAND, REMOVE PUTRID SUBSTANCES AND OBSTRUCTIONS.

(a) The City may drain, by artificial means, at the expenses of the City, any lot or land within the City upon which water, at any time, accumulates and becomes stagnant, in a way prejudicial to the public health, convenience or welfare by reason of not having a natural drainage outlet, or any lot or land within the City which cannot be drained by natural channels.

(b) The City shall have the authority to fill or drain any lot or land within its limits upon which water, at any time, becomes stagnant; remove all putrid substances from any lot; and remove all obstructions from culverts or cover drains or private property laid in any ditch, watercourse or drainage improvement which obstruct the water naturally flowing therein causing it to flow back or become stagnant, in a way prejudicial to the health, comfort or convenience of any of the residents of the neighborhood. If culverts or drains are of insufficient capacity, the City may make them of such capacity as is reasonably necessary to accommodate the flow at all times.
(Ord. 18-99. Passed 4-27-99.)

909.01 DEFINITIONS; MAP OF MAJOR AND MINOR DITCHES.

As used in this chapter, the words "ditches", "watercourses" and "drainage improvements" mean and include a stream of water flowing in a definite channel, having a bed and sides or banks, and discharging itself into some other stream or body of water, whether a natural formation or manmade, whether or not the stream flows continuously, whether or not it discharges itself into another stream or body of water. The terms "ditches", "watercourses" and "drainage improvements" include, but are not limited to, any ditch, drain or watercourse which has become the outlet of agricultural drainage, regardless of the time of usage, provided that the conditions contained in this chapter are complied with. Ditches are further classified herein as major and minor ditches, which are identified on a map or maps that may, from time to time, be prepared by or on behalf of the City showing the major and minor ditches in the City. (Ord. 18- 99. Passed 4-27-99.)

909.02 MAINTENANCE; AUTHORITY OF THE SERVICE DIRECTOR.

(b) In cleaning, repairing and performing other maintenance work on ditches, watercourses and drainage improvements, the Service Director or his designated agent may go upon adjoining or abutting lands within the area necessary for proper operation of the required machinery, tools, motor vehicles, conveyances or other equipment. The area necessary shall be seventy-five feet in the case of a major ditch and fifty feet in the case of a minor ditch, with the centerline thereof being the center of the ditch, watercourse or drainage improvement. If, in the course of the work, it is necessary to damage or temporarily remove fences, poles or wire lines, then the cost of repairing or replacing the fences, poles and wire lines shall be the responsibility of the City. (Ord. 18-99. Passed 4-27-99.)

909.03 AUTHORITY OF CITY GENERALLY.

The City shall have the authority to maintain, keep and repair ditches, watercourses and drainage improvements, together with facilities and appurtenances necessary and proper therefor. (Ord. 18-99. Passed 4-27-99.)

909.04 AUTHORITY OF CITY TO DRAIN OR FILL LOTS AND LAND, REMOVE PUTRID SUBSTANCES AND OBSTRUCTIONS.

(a) The City may drain, by artificial means, at the expenses of the City, any lot or land within the City upon which water, at any time, accumulates and becomes stagnant, in a way prejudicial to the public health, convenience or welfare by reason of not having a natural drainage outlet, or any lot or land within the City which cannot be drained by natural channels.

(b) The City shall have the authority to fill or drain any lot or land within its limits upon which water, at any time, becomes stagnant; remove all putrid substances from any lot; and remove all obstructions from culverts or cover drains or private property laid in any ditch, watercourse or drainage improvement which obstruct the water naturally flowing therein causing it to flow back or become stagnant, in a way prejudicial to the health, comfort or convenience of any of the residents of the neighborhood. If culverts or drains are of insufficient capacity, the City may make them of such capacity as is reasonably necessary to accommodate the flow at all times.

(Ord. 18-99. Passed 4-27-99.)

909.05 GENERAL PROHIBITIONS.

No person, firm or corporation shall:

(a) Prohibit or interfere with the City in the exercise of the duties and responsibilities set forth in this chapter.
